### REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teaches methods and computer program products which test network performance by defining test schedules including test protocols to be implemented and when the protocols should be executed for a plurality of defined connections on a network. He also teaches that at times specified in the test schedule, the endpoint node pair executes the test protocol and measures the performance of the network connection between the two nodes without requiring any involvement of application software which may or may not be installed on the computer. Chandra et al., (U.S. Patent number 6,397,359) is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination a method for determining computer network's performance during operation of a software application and further comprises generating from the network traffic data a latency sensitivity metric and a bandwidth sensitivity metric and comparing the two metrics to determine the network performance during the operation of the software application. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of computer network analysis.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
